## USPC Polocrosse Excel Scoresheet Overview

Below is a written overview on how the USPC Polocrosse Excel Scoresheet operates and how you will need to input information into the file.

If you are utilizing a spreadsheet for an upcoming competition, we recommend filling out the information at least a week before so the only thing that is needed the day of competition are the scores.

If you need help in learning how to score a Polocrosse competition, please visit the USPC Polocrosse Rulebook.

## Spreadsheet Contents

The spreadsheet has 7 tabs titled, Instructions, Teams \& HM, Day 1, Day 2, Day 3, Team Scores, and Divisions Placings, and can house up to 10 teams.

It is important to fill out all white cells if possible as many won't calculate the scores UNTIL information is placed in a cell.

All white cells are editable. Grey or blue cells lock in formulas or formatting. Please do not manipulate the colored cells as it could adversely affect the scoring of the program.

## Objectives and Functions

- Instructions - General layout and overview of how to fill out the spreadsheet
- Teams \& HM - Houses all information regarding the Team and Horse Management Scores.
- Day 1 - All scores from Day 1
- Day 2 - All scores from Day 2
- Day 3 - All scores from Day 3
- Team Scores - Overview of all team's scores (no input necessary on this page)
- Division Placings - Overview of all scores and placings broken down by division (no input necessary on this page)

## Instructions

The instructions tab is the very first tab of the scoresheet. On this tab it will walk you through the general layout and how to input scores in the scoresheet. There will also be several key pieces of information you will need to fill in on this tab.

## Name of Rally

The rally name will be pulled from this location and placed on all remaining sheets (except for the placings spreadsheet) of the excel file.

Name of Rally National Office Test

## Competition Divisions \& Number of Chukkas

The information placed in "Competition Divisions" will help sort the Team placings by division on the last tab. This will also be used as a dropdown to choose the division for each team.

The Number of Chukkas will be used to calculate HM scores. Please be aware that the HM score will not calculate until this information is entered in.

| Competition <br> Divisions | \# of <br> Chukkas |  |  |
| :--- | :---: | :---: | :---: |
| Novice Junior | 10 |  |  |
| Novice Senior | 10 |  |  |

|  |  |  |  |

## Club/Center

Enter in the clubs/centers that are participating in the spaces provided. This will be used as a dropdown for each of the teams.

No scores require this field to be filled out, however, it is good practice for recording and tracking purposes to know which members from clubs/centers are participating.

## Teams \& HM

This tab houses all information regarding each team, competitor, other scoring, and Horse Management scores.
All grey and teal cells indicate that it is locked to protect a formula or formatting. Please enter in the information in the white cells provided.

In the screenshot above, you can see that the information is split into three tables, the Team table, Other table, and Horse Management table.

## Team Table

The team table houses the team number, team name, Club/Center of team, team competition division, pinny \#, competitor, PC age, mount, mounted cert, and HM cert.

Again, all greyed cells are locked to preserve formatting. Please note that even though the Team number and "C" for captain are teal, the cell will become teal to indicate that an item has been chosen, but when looking at a blank version of the scoresheet, those two cells will be white.

Penalties should be a negative number ( -1 ) and bonus points should be a positive number (1). This column is then added to the overall riding score.

EX: Player gets a yellow card and receives 2 penalty points. "-2" would be inputted in the "Other
Scoring" scoring column.

## Horse Management

The Horse Management table houses all HM penalties. These will be recorded on HM sheets and handed to the scorer to input.

Enter in the points per chukka in the white spaces provided. These will then total at the end.

## Team Scores

This tab displays all of the team's scores. As you notice it is all grey and teal, there is no input necessary on this page as it already does the calculations for you by pulling them from various locations of the sheet.
